Profile

I am a dedicated professional and unafraid of embracing the missions and goals of the company and the pursuit of new challenges contributing to one's personal and professional development. I appreciate searching for new solutions and technologies by seeking new perspectives and work methodologies, and I believe the workload has to be done or accomplished as a team, directly or indirectly. Besides, I think that communication is key to the success of projects and products.

Personal Skills

Dedication, team spirit and persistence in researching for troubleshooting.

Education

- Bachelor in Information Systems - University Ritter dos Reis (2003 - 2011).

- English (Advanced)

Experience

Azion (April 2025).
At Azion, I work as an SRE following common DevOps practices, developing new exporters using Python language and maintaining the infrastructure, mainly using puppet, Terraform, git and CI/CD. My role also includes the monitoring and maintenance of Linux Servers.

DBServer (June 2024 - March 2025).
Worked as Devops/SRE on DELL, supporting GitLab projects, maintaining pipelines and ensuring the successful deployment of new releases. My activities also included infrastructure monitoring, focusing on the product stack, supporting users in timely tasks and incidents.

BairesDev (April 2022 - September 2023).
Acted as SRE (Devops) with focus in security, CI/CD and IaC with offshore teams.

Stone / Linx (May 2019 - March 2022).
Acted as SRE (Devops) alongside the Development Team, delivering deployment (CI/CD), monitoring and automation.

Interop (August 2018 - April 2019).
Had the role of Analyst support with focus in monitoring and systems automation.

OpServices (April 2011 - March 2018).
Acted as Scrum Master and security analyst on the development of new products. My daily activities demanded the role as a SysOps as well.

IBM (2010 - 2011).
1st and 2nd level support to customer Gerdau Brazil and USA, concerning about backup process, hotfixes, IIS and Monitoring
